- LOW POWER CONSUMPTION

PR-SCENT MK2 *professional* and PR-SCENT MK4 *professional*

The **PR-SCENT MK *professional*** fragrance machine series offers 2/4 professional fragrance machines in one housing, whereby the 2/4 individual fragrance outlets each use a “dry”, heated fragrance cartridge and a powerful fan to distribute the fragrance. All 2/4 fragrances can be mixed or one or two fragrances can be emitted more intensively.

The **PR-SCENT MK *professional*** fragrance machines are suitable for **installation in almost any room, hall or even tent. Outdoor use** is also possible depending on the conditions of use. Our fragrances are of very high quality and are based on natural raw materials with over 70 different fragrances available directly from stock. Depending on the application, the fragrance cartridge lasts for up to 3 months and is then easy and clean to replace within a few seconds.

PR-SCENT MK *professional* Series Features

Easy to use: The **PR-SCENT MK *professional*** is specially designed for easy use. Each fragrance can be individually controlled or adjusted via the illuminated LCD display.

Changing the cartridge: Each fragrance cartridge can be easily exchanged in a few seconds, no cables or hoses have to be connected - there is no longer a liquid container!

Controlled fan: The **PR-SCENT MK *professional*** is equipped with a speed control for the built-in fan and thus allows a quiet and fine adjustment of the room scent.

DMX operation: The **PR-SCENT MK *professional*** is equipped with a DMX 512 input / output so that it can be used under program control in professional multi-media and multi-sensual shows. The four fragrance outlets can be controlled independently of each other.

E-Mail: mail@pr-electronic.com – Web: www.pr-electronic.com

Serial control: The **PR-SCENT MK professional** can be controlled serial via RS232 for easier integration into multimedia installations

Timer operation: The **PR-SCENT MK professional** is equipped with an adjustable timer and this allows the cartridge to be used longer and, if necessary, reduces the concentration of fragrances for smaller rooms.

Week-Timer operation: The **PR-SCENT MK professional** is optionally equipped with real time clock and offers though 4 independently adjustable time periods per week.

Light sensor: The **PR-SCENT MK professional** so that it automatically switches on and off depending on the daylight.

Analog 0-10V control: The **PR-SCENT MK professional** can be controlled with an analog 0-10V signal or by analog, programmable controllers. The four fragrance outlets can be controlled independently of each other.

Control via network: The **PR-SCENT MK professional** can optionally be controlled via TCP / IP.

Operating hours: Counter with information on replacing the fragrance cartridges.

Remote version: The **PR-SCENT MK professional** is available as a remote version, with up to 2/4 of the scent diffusers detached from the machine

Dimensions Mk4 H275mm x B210mm x D385mm (435mm including rear connections)

Weight Mk2 pro: 5,65kg, MK2+ pro: 8,73kg, MK4 pro: 10,46kg

CE conformity CE compliant

The sense of smell has an **extremely large influence** on well-being and thus on the way people think and behave. With the nice feeling of a pleasant scent in the background, there is a longer lingering time and desire to buy as well as an intensification of positive feelings at events of all kinds.

Scent is a medium that appeals to a wider sense and thus **a further dimension of experience.**

The basic substances of our fragrances are manufactured by one of the most important suppliers of the cosmetics industry, and the production of the fragrance cartridges **in-house ensures excellent quality.** We are proud to offer only the best quality in connection with a "State of the Art" system for fragrance distribution, which allows **a perfect fragrance experience.**

Scent sensations are the catalyst to connect human feelings with an experience or a thing. The effect of fragrances should therefore **by no means be underestimated!**

- To get a wider sense of a "special effect"
- As a sales aid.
- To create a pleasant room fragrance.
- Improving productivity and performance.
- Identification with a company / idea
- To eliminate unpleasant room odors.
